Character Education Word of the Month

JUSTICE

A concept involving the fair and moral treatment of all persons, especially in law.

In Character Education we define Justice as "fair and equitable behavior which is consistent with the laws and principles that govern a democratic society".

What does that mean in the classroom? Students expect that all teachers will treat each student fairly and with respect. By the same measure, teachers should expect that each student treat their teacher with fairness and respect. We must expect, and insist that each student treat the other students with that same fairness and respect

"Injustice anywhere is a threat to justice everywhere", according to Martin Luther King, Jr.

During February as we emphasize Justice with our students and, with our co-workers as well, let's remember:

- Treat all students fairly.
- Treat co-workers with respect and justice.
- Use the term "Justice" often, and interchangeably with "fairness."
 - Look for examples in the "real world" to give emphasis to the importance of justice.
 - Encourage books/stories demonstrating positive outcomes when justice is practiced.

Discipline Tips for Parents.....

Positive discipline is about helping children develop their thinking skills, social and life skills, and the belief that they're capable.

Keep up with important school information at our website. Wesleyelementary.org
